## CREATIVE SOLUTIONS ANNOUNCES MACROMEDIA FLASH™ INTEGRATION IN NEW WEB BUILDER SOLUTION™ RELEASE

Dexter, MI—Creative Solutions announced today a new release of Web Builder Solution. Using the latest version of this advanced web building tool, accounting firms can now easily incorporate dynamic elements such as animation, movies, and complete multi-media presentations into their professional web presence.

“The latest release of Web Builder Solution features an extremely powerful graphics engine and new template designs that supports animation,” said Creative Solutions director of marketing, Teresa Mackintosh. “These enhancements give users the ability to quickly and easily add interactive components, including Macromedia Flash movies to their websites, further increasing the effectiveness of their web-based client communications.”

Creative Solutions will be providing users with a Flash demo of *NetClient*™ private client portals for their websites in the near future.

The new version of Web Builder Solution also includes a significantly more robust and intuitive WYSIWYG (What You See Is What You Get) content editor. All Web Builder Solution site content can now be edited using this interactive editor, which uses commands similar to those employed by Microsoft® Word® and displays content exactly as it will appear on the user’s website.

“These improvements make the tools needed to build an effective, highly professional website accessible to firms of every size,” said president and CEO, Jon Baron. “Less than a year ago, the technology for this type of interactive web design required an investment of tens of thousands of dollars. Now, any firm can take advantage of it as part of the standard Web Builder Solution package.”

The new release of Web Builder Solution is available immediately.

### **About Web Builder Solution**

Web Builder Solution is a template-based web building tool designed specifically for public accountants and tax professionals. Accountants can create a website by simply selecting from a library of templates and a variety of images, sample text, and color variations. Users can also upload their own images and logos. Web Builder Solution offers numerous sophisticated options, including: financial calculators, newsletter articles, an editable calendar, and professional templates. Firms can also use the system’s advanced email feature, which allows them to create email addresses using their own unique domain name.

## **About Creative Solutions and The Thomson Corporation**

Founded in 1979, Creative Solutions offers a comprehensive line of integrated write-up, payroll, client accounting, depreciation, trial balance, tax, tax planning, and practice management software, as well as web building and client portal services for practicing accountants. With more than 60 CPAs on staff, Creative Solutions offers software written for accountants, by accountants. More than 50,000 firms have Creative Solutions products. Creative Solutions is a part of Thomson Legal & Regulatory and a business unit of Thomson Tax & Accounting, which also includes RIA, PPC, and Fast-Tax.
