THOMSON REUTERS ANNOUNCES BREAKTHROUGH SEARCH CAPABILITY WITH GOFILEROOM ES™ AND QUICKLAUNCH

Dexter, MI, August 1, 2008—The Tax & Accounting business of Thomson Reuters, formerly Thomson Tax & Accounting, announces the release of QuickLaunch—a powerful new utility that, in combination with GoFileRoom ES, sets the new standard for document management search functionality. With QuickLaunch, users can instantly search and identify documents and/or workflow folders stored in GoFileRoom ES from third-party applications.

QuickLaunch elevates the sophisticated index and full text search capabilities in GoFileRoom ES. Using QuickLaunch, customers can now query GoFileRoom ES documents from other applications—like those within Thomson Reuters' CS Professional Suite and Enterprise Suite, as well as competitor products. When working in a core application, users can search documents without having to launch GoFileRoom ES in tandem. The primary benefit is significant time savings—accomplished via pervasive integration across numerous applications.

"Our primary goal is to help our users save time, which is why we consistently enhance our applications and develop new and innovative utilities—like QuickLaunch," said Adam Kupperman, Senior Director of Enterprise Sales, Thomson Reuters. "Our customers spend a great deal of time working in their core applications, such as tax or Microsoft Outlook. The old paradigm had them logging in to their document management system separately and searching for needed documents related to a client or engagement. With QuickLaunch, that step is eliminated."

GoFileRoom ES is Thomson Reuters' integrated and secure online document management, workflow, and scanning solution. For more information about Thomson Reuters' products and services, please visit ES.ThomsonReuters.com.
