

ADVANCED ACCOUNTING

"My work is always at my fingertips and I don't have to worry about program updates, file backups, delivery to clients.."

"I was tired of relying on a bunch of computer geeks. We reduced our IT staff within three months of getting the service. Hardware and software are non-issues with Virtual Office CS!"

THE DECISION

"For me, Virtual Office CS fulfilled a dream. I had always wanted to work for myself, but the huge volume of paperwork, constant updating of tax books, and tedious re-keying of data between programs kept me from making my own practice a reality. The integration of the CS Professional Suite and the Virtual Office CS environment allowed us to keep hardware costs to a minimum and work without a lot of technical support."

THE TIMING

"I saw Virtual Office CS in 2001 and THAT is when I got serious about growing my own practice. I've used it right from the beginning."

THE SAVINGS AND BENEFITS

Accessibility and Security—*"My work is always at my fingertips and I don't have to worry about program updates, file backups, delivery to clients, carrying work home with me, or touching paper. I know my software and data are secure."*

Time and Money—*"I was able to see the fluid work process right away, from CSA [CS Professional Suite Accounting] to UltraTax CS to FileCabinet CS to the portal."*

"Frankly, for me, without the tight integration of the products it would not be possible to handle as many clients. And more clients mean more money."
