

# ANY PAYROLL, ANYTIME

*"I can sum up why we love Accounting CS Payroll in three words: No month-end transmittals."*

**Murphy+Blesch CPAs, LLP** has been processing payrolls for over 30 years. They've seen it all, but Karen Blesch says that she has been pleasantly surprised by the change and innovation that have redefined the payroll business in just the past few years. She says the real game changer has been cloud-based software that has given both firms and clients many more options in how they handle their payroll.

*"We have some clients who like to handle their own payroll, and Accounting CS Client Access is a great way to help them do that," she said. "They have more control, they can print their own checks right from the system, and that makes them happy. We can work behind the scenes to do their tax work and serve as sort of a safety net. They're happier, we're happier, and both of our systems run so much more smoothly."*

Other clients choose to have the firm handle the entire payroll process using Accounting CS Payroll. Blesch says it's a great option for clients who don't want any part of the payroll process. For those clients, seamless integration ensures that all the information they need is in place at the end of the month.

*"I can sum up why we love Accounting CS Payroll in three words: No month-end transmittals," Blesch said. "We have a real-time connection with our payroll clients, so we get all their payroll data in real time and it's all there at the end of the month. It's so much easier."*

While in-house processing has worked well for Murphy+Blesch, they've begun looking at the myPay Solutions payroll service as a way to process larger payroll clients, should the need arise in the future.

*"I think the biggest thing that we get from all these new options is confidence," Blesch said. "We can offer payroll to any client that comes in the door. Whatever their size, whatever their goals, we know that we can meet their needs and make money doing it."*

ACCOUNTING CS PAYROLL
