

**2016 FIXED ASSETS CS, v.2016.1.5**  
**User Bulletin FA-16.1.5: Update**

**February 1, 2017**

---

This user bulletin describes a change made to this release of Fixed Assets CS.®

**CHANGES**

**Fixed Assets CS login security – Inactivity sign-on dialog**

With this release, the ability to close the Fixed Assets CS program from the inactivity sign-on dialog is available in most situations. If Fixed Assets CS requires further input to safely save and exit, the option will not be available. Prior to this release, the ability to close the Fixed Assets CS program was not available from the inactivity sign-on dialog.

For more information, see [“Logging in to CS Professional Suite applications”](#) in the Help & How-To Center.

**AMT/ACE adjustment when electing out of bonus depreciation**

There will no longer be an AMT/ACE adjustment when the election out of bonus depreciation is made for assets placed in service after 12/31/15 under **Setup > Options > Bonus Depreciation Elections**.

If the election has already been made to elect out of bonus depreciation, the AMT and ACE treatments will need to be rebuilt to remove the adjustments:

To rebuild the AMT and ACE treatments, perform the following steps

1. In the Asset List window, choose **Setup > Treatments**.
2. In the Treatments dialog, highlight the AMT treatment.
3. Click the Build button.
4. Select the Build assets placed in service in the following tax year option.
5. Select 2016.
6. Click OK to build the treatment.
7. Repeat steps 2-6 above for the ACE treatment if applicable.
