

THOMSON REUTERS

**2017 FIXED ASSETS CS, v.2017.1.9
User Bulletin FA-17.1.9 Update**

August 9, 2018

This user bulletin describes changes made to this release of Fixed Assets CS.®

CHANGES

Enhanced security

As part of Thomson Reuters' ongoing monitoring of security best practices, we've made background changes to Fixed Assets CS to meet new security standards for online connections, such as integration with Onvio.

Fixed Assets CS was updated to use Transport Layer Security (TLS) v.1.2. This is a protocol used for encrypting and transmitting data securely when integrating with Thomson Reuters' web-based products and services. While this update to Fixed Assets CS v. 2017.1.9 will have no impact on functionality or user experience in the application, the update to this version of TLS is a recommended best practice by security professionals.

State calculations

Due to legislative changes, the Pennsylvania treatment for 1120 C Corporations will no longer allow bonus depreciation for assets placed in service after September 27, 2017.
