## **CREATIVE SOLUTIONS ANNOUNCES NEW RELEASE OF ULTRATAX® WEB-BASED CLIENT ORGANIZER**

Dexter, MI—Creative Solutions announced today the release of their UltraTax web-based Client Organizer—another advanced online offering. With the web-based version of the Client Organizer, accountants can offer clients an online version that can be completed at the client's convenience and returned to accountants electronically—saving time, paper, and postage costs. Creative Solutions now offers three Client Organizer options, including paper, electronic, and web-based versions.

“With the addition of a web-based version of the Client Organizer, we are enabling our customers to further expand their online client services,” said Creative Solutions’ vice president of product strategy, Greg LaFollette. “The web-enabled Organizer provides clients with an easy and convenient online version, while offering accountants a more profitable alternative.”

Accountants simply provide their clients with a direct link on their website or a URL link in an email to access the Client Organizer. Once clients complete the Organizer online, they click the submit button and the accountant is automatically notified. The accountant can then download Client Organizer information directly into UltraTax. The web-enabled Client Organizer offers a highly efficient means for collecting client information, as clients are responsible for filling out initial tax information and mailing and printing tasks are virtually eliminated.

“The web version of the Client Organizer offers accountants significant time savings, which is especially important during the busy tax season,” said Jon Baron, Creative Solutions’ president and CEO. “It is the latest example of Creative Solutions’ use of technology to make accountants more productive and more profitable.”

The web-based version of the Client Organizer can also be made available through NetClient™ personal, private portals and is available with the November release of UltraTax.

### **About Creative Solutions**

Founded in 1979, Creative Solutions ([www.CreativeSolutions.com](http://www.CreativeSolutions.com)) offers a comprehensive line of integrated write-up, payroll, client accounting, depreciation, trial balance, tax, tax planning and practice management software, as well as web building and client portal services for practicing accountants.
